

# What's New in Scoutlier 2.0

Our enhanced platform is now easier, faster, and more powerful than before. It is designed to help you quickly transform your teaching so it works effectively and equitably in any situation: in the classroom; at home; in a lab; on a field trip. Anywhere. Anytime.

The school closures have proved extremely difficult, as virtual learning replaced our traditional classrooms almost overnight. Future uncertainty promises to be challenging too, as we will likely teach in multiple modalities simultaneously. At Scoutlier we remain fully committed to helping you succeed in whatever learning environment you and your students find yourselves. As our amazing Scoutlier community has grown exponentially, you have provided us with incredible input on what you need. We have been listening and coding, and the result is Scoutlier 2.0.

## ENHANCED FEATURES

We have created a streamlined authoring tool to quickly create intuitive, scaffolded lessons, collaborative work opportunities and assessments for your students. We have expanded resources for you with expert-designed templates to reduce the work and guide you as you develop your own personalized teaching materials.

The growth of the community of Scoutlier users has enriched the community library of teaching materials created by users which you can borrow and adapt for your own use. We have also expanded the opportunity to share (or receive) lessons and assessments from your fellow Scoutlier users by email.

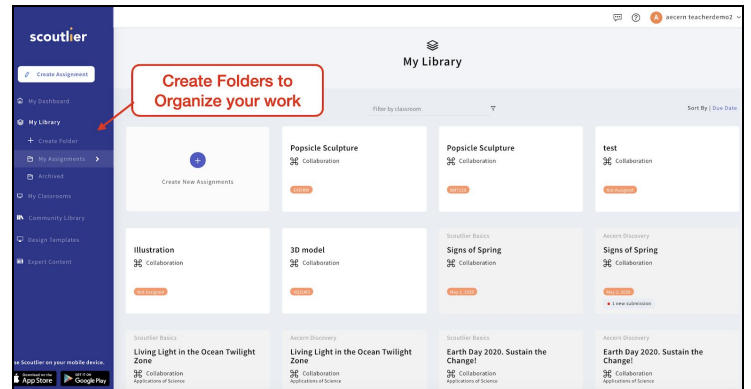

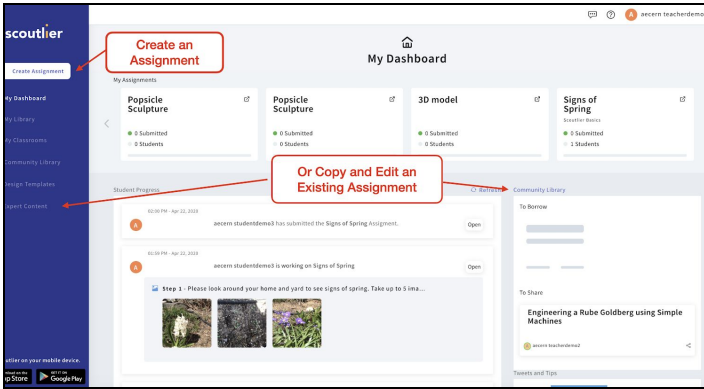

And to help you maximize your preptime, we introduced folders to organize your activities.

You can continue to view the real-time work of your students now with live statistics on their progress, and you can now add and download grades on your students' assignments.

### ENHANCED FEATURES

- Quick Authoring Tool
- Expert Designed Templates
- Flexible Folders
- Peer to Peer Sharing
- In App Grading
- Real time view of student work
