

# Creating Your First Assignment

Scoutlier is a highly adaptive tool that is designed to help you quickly transform your teaching to work effectively and equitably in any situation: in the classroom; at home; in a lab; on a field trip. Anywhere. Anytime. Let's walk through running a lesson via Scoutlier from account creation to reviewing student responses and you will see how easy it is to use.

Visit [scoutlier.com](https://scoutlier.com) to create your free account.

Create your account with your email account or login with your Google or Microsoft email account.

If you use Google Classroom create your account with your Google Classroom credentials.

As a new user the dashboard looks a little empty. Don't worry it will soon be an active center of teaching and learning.

- Class Activity: This area of the dashboard will populate with all your active assignments.
- Student Progress: Here you will see the real time work of your students.
- Community Library: Look here for assignments and templates from the Scoutlier community.
- Expert Content: Here you will find content from our expert teachers and curriculum partners. You can easily copy this content and modify to meet your student needs

Click the Create Assignment button to start your first assignment.

- Title: Enter the title of the assignment
- Description: The description
- Folder: Select the folder. You can create folders in My Library.
- Add Resources: You can add links and resource for your students here or in a later step
- Click Create Assignment

## What Kind of Assignment?

Here you can choose between Collaboration where students can see each other's submissions or Assessment when only the teacher can see the students work.

Now let's build the assignment details. You can add resources and tasks for students to complete.

In this example we have asked the students to submit photos of leaves and explain with text why they selected them. We could have had students give an audio or video response or even answer a multiple choice questions.

To add resources add a title and provide a link.

Clicking on Preview will allow you to see what the assignment will look like in the student view.

When you save the assignment you will be able to assign it to students.

If you are using Google Classroom or Scoutlier Classroom you can select the classes and due date. You can also share an assignment with a code. Just copy the link with the code and share via email or your LMS.

Your assignments will appear in My Library.

When you open the assignment you will see the results submitted in the overview tab. Clicking on view data on the right will allow you to see all the results submitted.

Each photo is labeled with the student's name. If this was a collaborative assignment students would also be able to see all the submissions.

In the Progress Report tab you can see individual student progress.

Select a student to review their work and enter a grade. If you are a classroom user you can download the grades; a Google classroom user can also return their work.

We have just run through a lesson from creation to reviewing student responses now it is time give it a try.
